## Send a video greeting from Copenhagen Airport

Last summer, about 1,000 passengers sent an electronic post card, a so-called Dip card, with a holiday greeting from the airport. The airport now expands the concept and makes it possible for the passengers to send a video greeting – a so-called V-mail – to friends and family.

### Easy to use

V-mail is a Danish invention and is very easy to use. All you have to do is to stand in front of the video mail terminal, press on and talk to the screen. You then have 10 seconds to shoot a mini movie with a personal greeting. After that you type in the e-mail address of the person you want to send the v-mail, and the mail is on its way.

The video mail terminal is placed on Nytorv – the open place in Terminal 3 – right opposite the newly opened shopping area, The Atrium.

It is possible to send v-mails from June to the end of August. During June, the service is for free. After that, the price will be DKK 10 per video greeting.
