

Sustainability Key Facts & Figures 2024

DECARBONISATION

Net zero
in own operations by

2030

33%

of the airport's **own vehicles** are electric

430

charging stations

The airport's carbon efforts are certified with

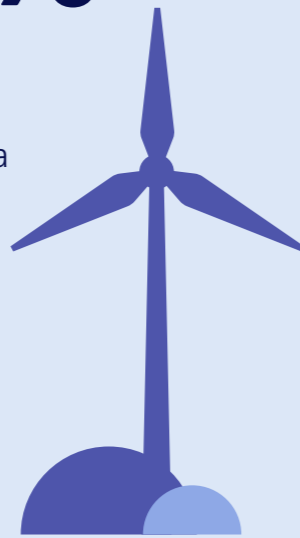

ACA 4+

From 2025, CPH's electricity will be

100%

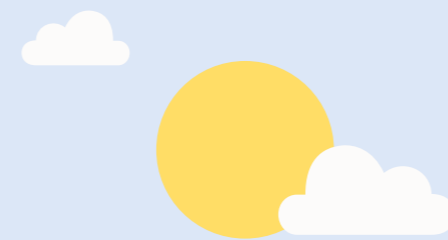

covered by **renewable energy** through a Power Purchase Agreement (PPA) delivered from two wind farms in Jutland

The airport has purchased carbon removal credits equivalent to

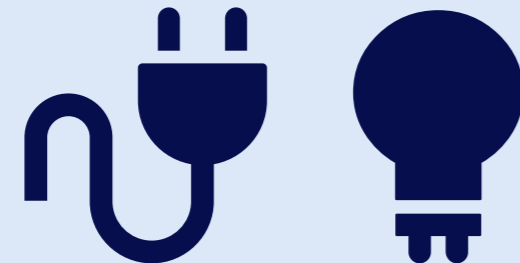

23,000

t/CO₂ in 2024

Annual Airport electricity consumption in 2024 95.9 GWh – **Energy savings** for 2024

1.77 GWh

ISO 50001 certified in Energy Management

Solar panels cover

4%

of total annual electricity consumption

ENVIRONMENTAL IMPACTS

Water consumption in 2024:

547,645 m³

23% stemming from grey water

4 PFAS remediation plants, with the construction of a fifth under development

2,400m²

dedicated to more diverse planting in collaboration with **'Vild med Vilje'**

SOCIAL IMPACTS

17,500

people employed throughout the airport

Member of the **UN Global Compact Network**

WE SUPPORT

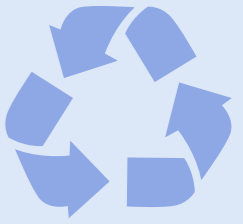

Partnering with **'LGBT+ Denmark'** and **'The Sunflower'**

Partnership with **'Red Cross'** and agreements with **'Hus Forbi'** and **'Blå Kors'**

CIRCULARITY

33%

recycling rate in 2024
60% recycling rate goal by 2030

Bio-waste collected in 2024:

526t

Collaborating with **'Too Good To Go'** on reducing food waste

INNOVATION & PARTNERSHIPS

A large battery was installed: can cover around

1% of Copenhagen Airport's daily energy consumption

- Partner in **'ALIGHT'** focusing on more sustainable aviation solutions for the future

Partnership with:

- 'CIP, the Airport of Aalborg'** and **'SAS'** to increase Danish eSAF production
- Part of the **'Nordic Network for Electric Aviation'** to strengthen electric flights
- Part of the project SAFE within **'MissionGreenFuels'**
- Partner in **'Project Skypower'** to strengthen the market for eSAF
- Partner in **'Luftfartens klimapartnerskab'**
